

SMO Intro 1

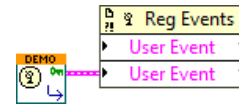

TestLauncher.vi is an example created by the SMO Editor. Think of this as your application that is *using* the SMO (which likely will not be part of your class.)

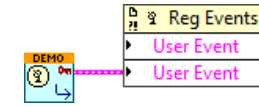

Startup:

Test Launcher

Register for public events

Process.vi

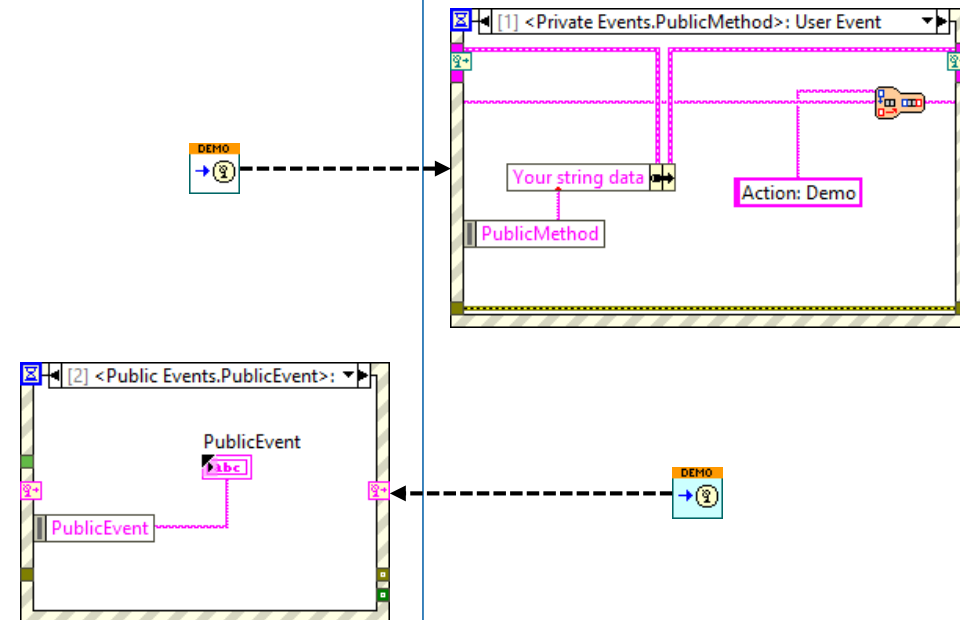

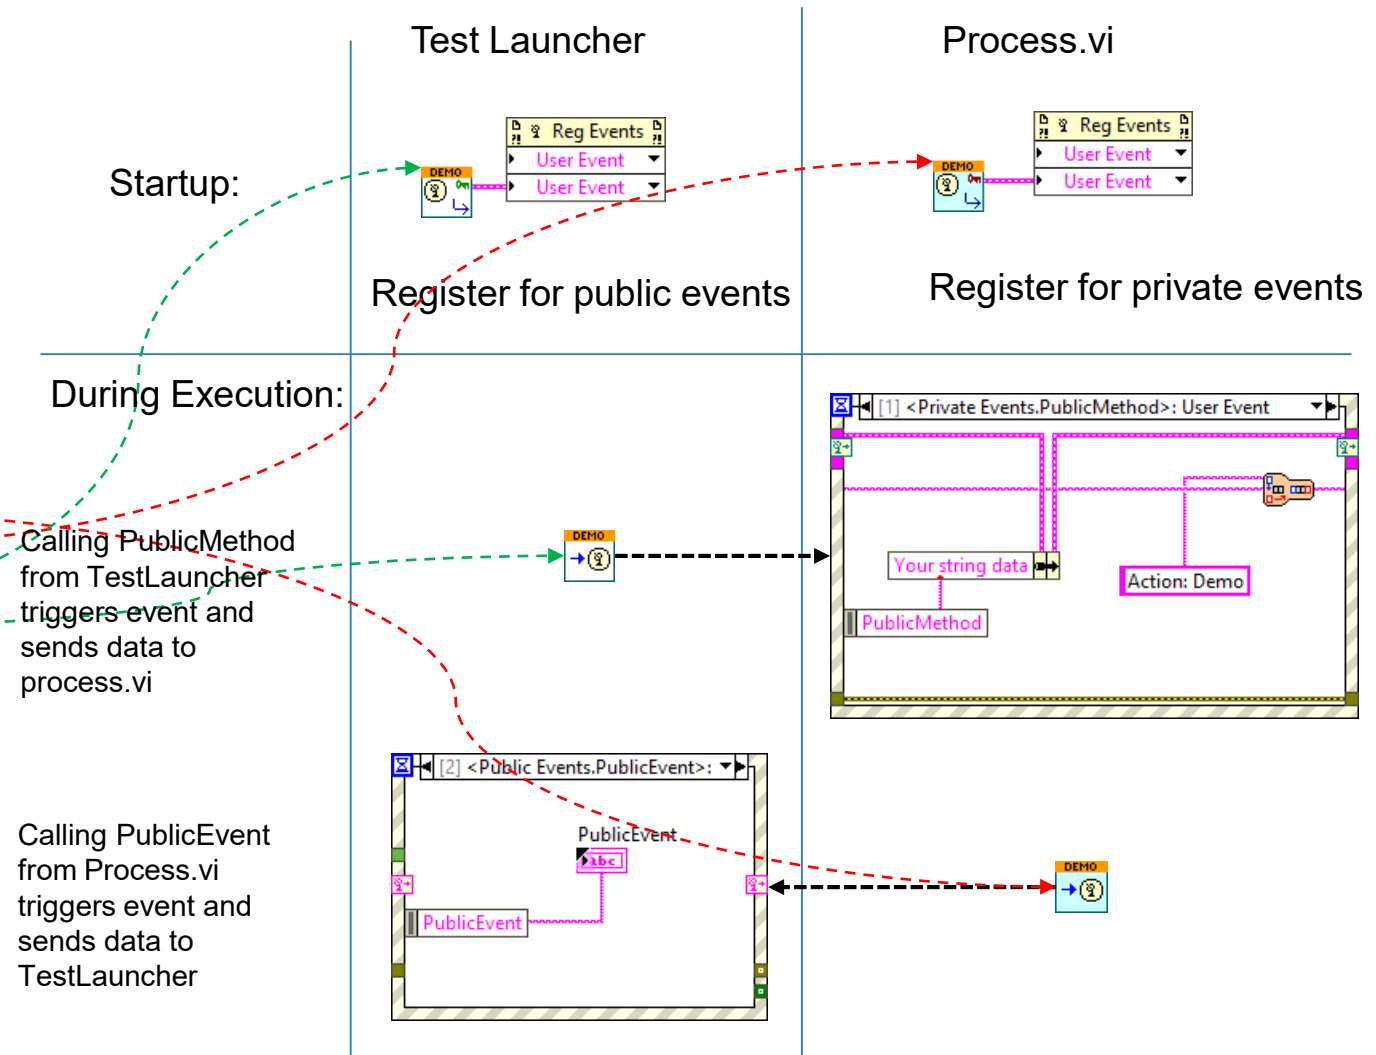

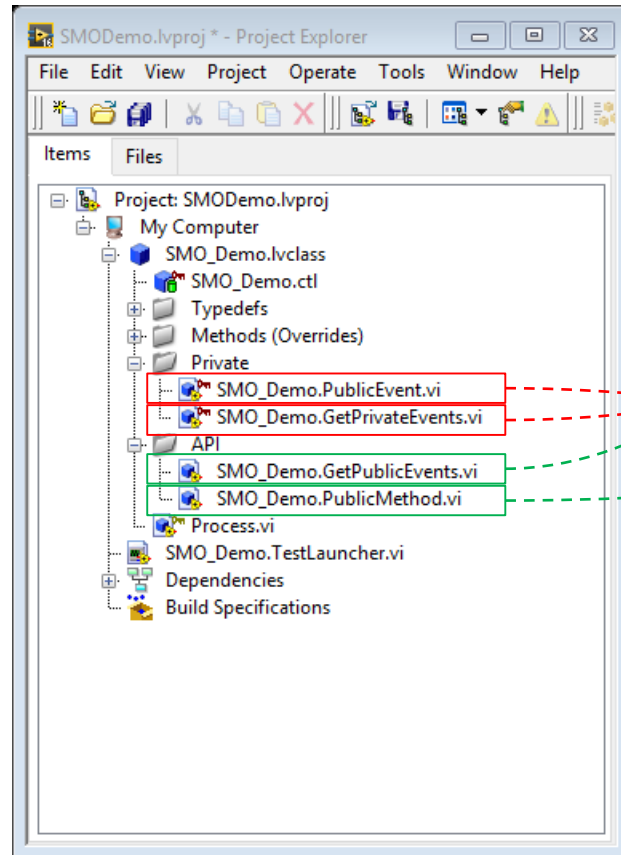

Register for private events

During Execution:

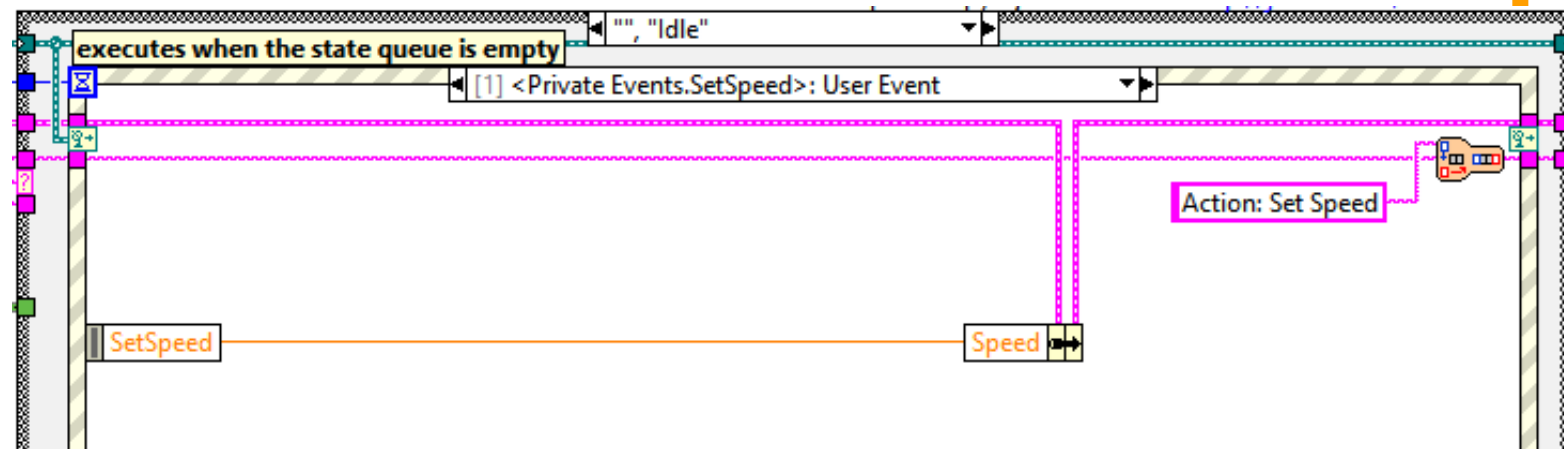

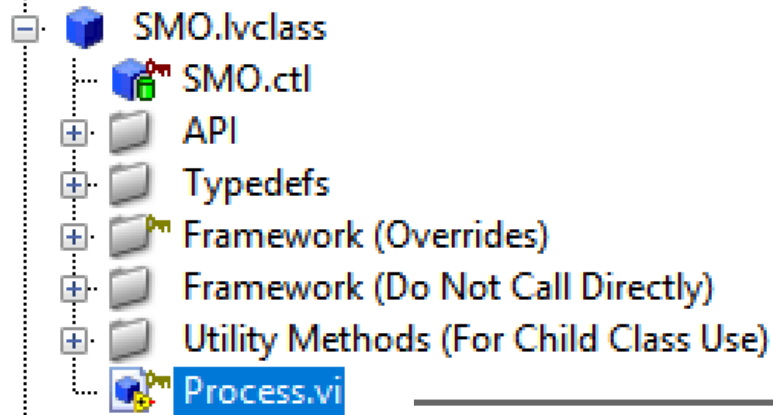

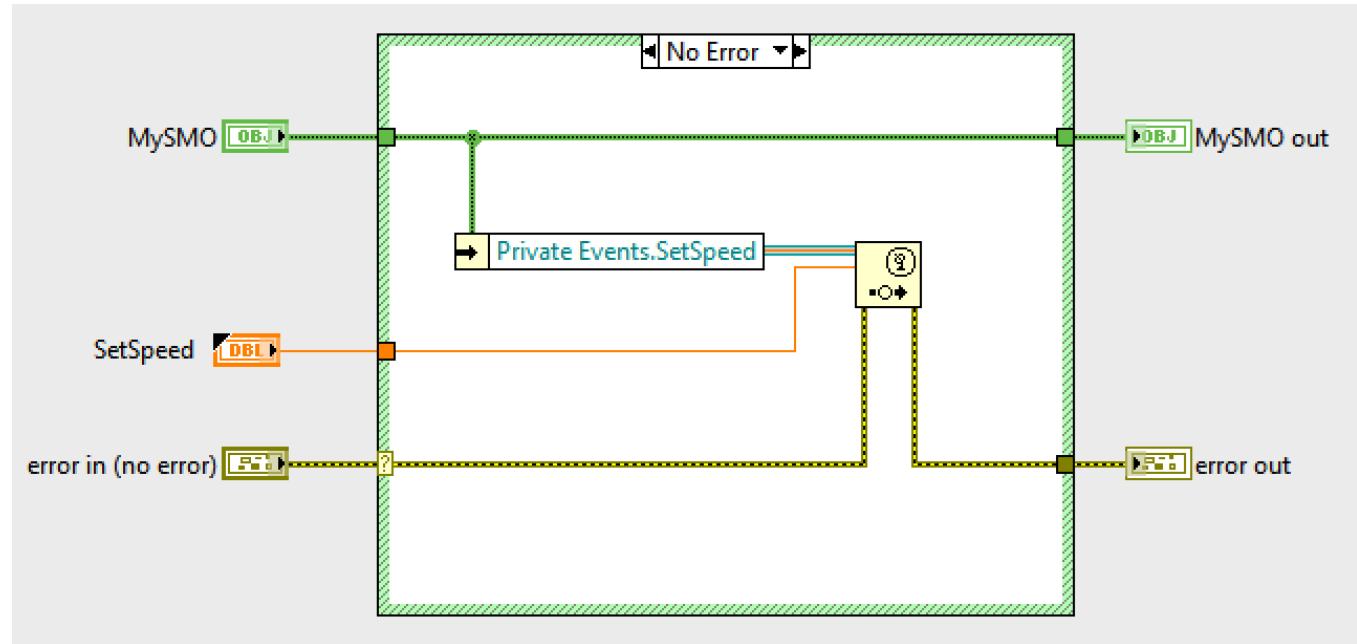

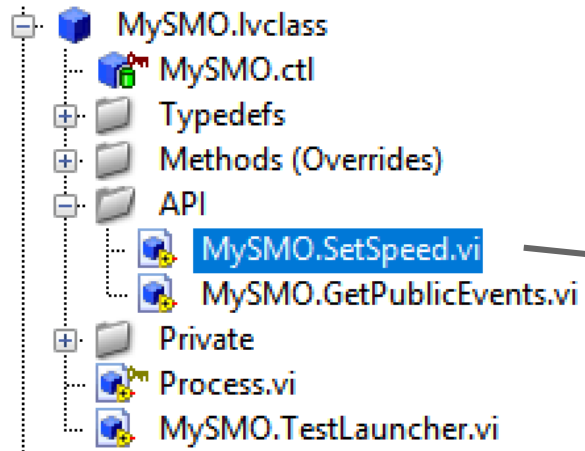

Calling
PublicMethod from
TestLauncher
triggers event and
sends data to
process.vi

Calling PublicEvent
from Process.vi
triggers event and
sends data to
TestLauncher

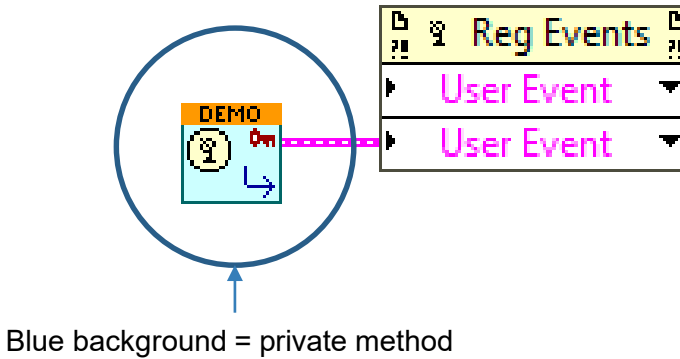

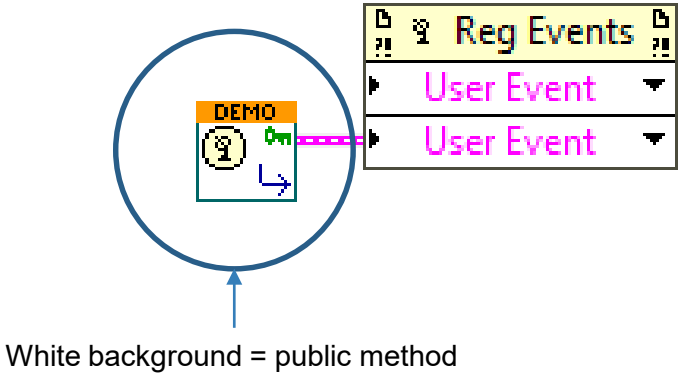

State Machine Objects: Dynamic Events

Change your icons to make them useful!

Use glyphs provided by LabVIEW to make your life easy!
